TECHNICAL DATAS

TRAILIUM DUAL-DENSITY ANTISTATIC PU OUTSOLE

- **4 mm lugs:** provide enhanced grip, particularly suited to demanding construction and heavy-industry environments.
- **Liquid and mud drainage channels:** facilitate evacuation from beneath the outsole and help maintain effective grip on challenging surfaces.
- **Side edges and 15 mm pronounced heel:** provide enhanced grip on ladder rungs and greater security when climbing up and down.
- **Large contact surface:** provides excellent stability and balance with every step.
- **Arch support:** improves foot support and contributes to lasting walking comfort throughout the day.
- **Heel cushioning:** absorbs part of the impact and helps reduce stress on the feet, back and joints.
- **Outsole injected in France**: injection using recycled polyol derived from our production waste.

Adhesion coefficient – basic requirements:
- forward heel slip: 0.43 (standard ≥ 0.31)
- backward forepart slip: 0.61 (standard ≥ 0.36)

SR adhesion coefficient:
- forward heel slip: 0.27 (standard ≥ 0.19)
- backward forepart slip: 0.48 (standard ≥ 0.22)
